

62,17 JUNE BARGAIN OF THE MONTH

Those of you who have been successful growing Mature Orchids and Back Bulb Cuttings, should have no trouble with seedlings well established in 2½-inch pots. By the time they reach this stage in their development, we call them "teen-agers," and they already have outgrown most of the dangers that beset them when they were "babies"!

In fact, many folks report that 2½-inch seedlings respond and grow much better for them than back bulbs do. While they won't reach blooming size quite as quickly as back bulbs, there is the added challenge that your unbloomed seedling may prove to be an AWARD WINNING HYBRID! If you buy a back bulb from an awarded plant, you pay from \$50.00 to \$150.00 dollars per bulb for it!

The following "Bargain of the Month" assortment of husky "teen-agers" newly established in 2½-inch pots will not require shifting for at least a year. They should give you a well-rounded collection, due to wide color range: White, White-Colored-Lip, Colored, Yellow and Red.

If even one of the six blooms an A.M. or F.C.C. flower for you, it will return your fifteen dollar investment many, MANY times over. Even if all six prove just averagely good, they will be worth the fifteen dollars, EACH, so how can you lose?

#	NAME	DESCRIPTION	PRICE
